By Order

Shimoga, Hassan, Yedatore, Hole-Narsipur, Melkote, Chamrajnagar, Hunsur and French Rocks, were in various stages of progress during the year. It is gratifying to note that the concessions offered by Government in the matter of the supply of small electrically driven pumps for the pumping of water from wells for agricultural purposes are being availed of in an increasing degree year after year, the number of pumping installations in service at the end of the year being 107 as against 55 at the end of the previous year.

15. *Special schemes under consideration or progress.*—There was good progress in the installation of Automatic Telephones at Bangalore and Mysore for which there has been demand from business men and the general public. The system has since come into working order in both the Cities.

Detailed estimates and drawings in connection with the scheme of generating electricity at the Jog Falls were under preparation during the year. The scheme provides in the first instance for the generation and delivery of power at the Bhadravati Iron Works, Davangere, Harihar and other towns to the extent of 10,000 Horse Power and it admits of extensions to an ultimate capacity of 40,000 Horse Power.

16. *Personnel.*—Mr. S. G. Forbes, Chief Electrical Engineer, was on leave for six months and two days from 11th April 1928. He was on special duty in connection with the Cauvery Arbitration Works for about four months from 8th March 1929. Mr. C. M. Cariappa, General Superintendent, officiated as Chief Electrical Engineer on both the occasions.

17. The working of the Department continued to be satisfactory during the year.

K. R. SESHACHAR,
Secretary to Government,
Electrical Department.
